

**RAJESH KUMAR R**  
**Senior IT Operations & Endpoint Management Analyst**  
**and cloud security engineer**

+91 9790763119 | [rrajeshkumaroff@gmail.com](mailto:rrajeshkumaroff@gmail.com)

**Summary**

Seeking a challenging role in a forward-thinking company to apply unique experience in cloud environment Where I can use my excellent cloud computing abilities in developing and managing virtual environments and be beneficial for my company.

**Experience**

**Senior Analyst | Kaar Technologies, Bangalore (2024 -Present)**

**Night Shift Operations | Cloud & Network Management**

- Configure and deploy new laptops remotely via cloud-based provisioning (INTUNE), ensuring compliance with organizational standards.
- Implemented and managed application deployment through the Company Portal, enabling users to install approved applications independently and significantly reducing manual software installation requests to the IT team.
- Manage Microsoft Azure, Office 365, Intune, and SharePoint environments — handling complete lifecycle operations from user creation to deactivation.
- Maintained and managed the complete IT Asset Inventory for the US, UK, and Bangalore office, ensuring accurate asset tracking, allocation, auditing, lifecycle management, and compliance with organizational standards.
- Monitor and ensure successful completion of scheduled backups using Acronis and NAS systems for US-based environments; perform troubleshooting and reconfiguration when failures occur.
- Coordinate and resolve end-to-end IT operational issues independently during night shift to ensure business continuity.
- Acted as a User Administrator, assisting end users with account lockouts, login issues, password resets, and access-related incidents.
- Served as an Authenticator Administrator, providing support for Multi-Factor Authentication (MFA) issues, device registrations, and user authentication challenges.

**Cloud Security Engineer | Secure Network Solutions, Chennai (2023 – 2024)**

**AWS Infrastructure | Network Security & Firewall Management**

- Designed and configured AWS networking components, including VPCs (Virtual Private Clouds), subnets, security groups, and route tables, ensuring secure and efficient network communication.
- Deployed, configured, and managed scalable and secure web servers on Amazon Web Services (AWS) using EC2 (Elastic Compute Cloud) instances.
- Implemented monitoring and logging solutions using Amazon CloudWatch to track server performance, resource utilization, and system health, along with configuring alerts for critical thresholds.
- Deployed, configured, and troubleshoot FortiGate firewalls in AWS environments to enhance network security and protect cloud resources from unauthorized access and threats.

- Managed AWS Identity and Access Management (IAM) roles, users, and policies to enforce secure access control and adhere to security best practices.
- Assisted in maintaining cloud security standards by implementing security controls, reviewing firewall policies, and supporting incident troubleshooting activities.

## Projects

### Deploying firewalls in AWS environment:

Multiple VPC with single firewall - Created 3 VPC and connected 3 VPC using transit gateway for communication one VPC will be used as a public and other one will be used for application hosting and other one will be used for database. Implemented the firewall in the public VPC. So, the traffic will be coming from the first VPC and goes through the other VPC.

### Disaster Management:

Created a disaster recovery in two different regions and developed a application using Word press to continuous sync using S3, if any one server is failed due to some disaster one will be up and running.

## Technical Skills

### AZURE

- Microsoft Intune – Device enrollment, configuration profiles, compliance policies, application deployment, remote troubleshooting, and autopilot setup
- Microsoft 365 Administration – User lifecycle management, mailbox configuration, license assignment, and security management
- SharePoint Online – Site creation, permission management, document library configuration, and access control.

### AWS - Proficient knowledge in AWS services such as

- Launching EC2 instance and managing the volume, backup the OS using AMI and create the Elastic load balancers, Auto scaling groups.
- Managing and creating a user, groups, role and polices permission by using Identify Access Management (IAM).
- Knowledge to Create a Virtual private cloud (VPC) to isolate from other Virtual Networks.
- Managing and creating an S3 bucket and uploading an object and versioning the objects and hosting a static web server.

### NETWORKING:

- Firewall - Hand-on experience in implementing a new FortiGate firewall in Cloud (AWS) and in on-premises environment.
- Hands on experience in setting the firewall in SDWAN zone for high network performance.
- Migration - Having a Good knowledge in migrating from small firewall to advanced level of firewall.
- Hands on experience in making the firewall to HA and good knowledge in troubleshooting.
- Operating system – Good knowledge in installing and troubleshooting in windows and Linux OS.

## Certificate and courses:

- Completed Courses on AWS, LINUX, CCNA at Besant Technology
- Completed Azure Basic fundamentals certification.

## Education:

- ✓ Bachelor of Computer Application (Cloud technology & information security) from B.S. Abdur Rahman Crescent Institute of Science and Technology.
  - CGPA Obtained: 7.50%                      Year of completion: 2021
- ✓ HSC from Ananthavalli Matriculation Higher Secondary School
  - Percentage Obtained: 65%                      Year of completion: 2018
- ✓ SSLC High School from Ananthavalli Matriculation Higher Secondary School.
  - Percentage Obtained: 82%                      Year of completion: 2016

## Area of Interest:

- ✓ Cloud computing with DevOps.
- ✓ Networking (**Firewall**)

## Declaration:

I declare that the information furnished above is true to the best of my knowledge
